Technical Support Operations ◆ Escalation Management ◆ ARR Protection ◆ AI-Driven Automation ◆ Workforce Planning ◆ SaaS & Payments ◆ P&L Management ◆ QBR / MBR Reporting ◆ Voice of Customer (VOC) ◆ CSAT & NPS Improvement ◆ Professional Services ◆ Cross-functional Leadership

PROFESSIONAL SUMMARY

Results-driven Senior Manager with 13+ years leading global Technical Support and Professional Services teams across SaaS and Payments industries. Specializing in building high-performing, data-driven support organizations — scaling remote teams, protecting Annual Recurring Revenue (ARR), reducing escalations, and delivering measurable CSAT and NPS improvements. Currently driving AI-augmented support workflows, intelligent automation, and customer success initiatives at Corcentric.

Certified: PMP (PMI) | COPC Certified Manager | Six Sigma Green Belt | Scrum Master

PROFESSIONAL EXPERIENCE

CORCENTRIC PAYMENTS | Sept 2022 – Present | Remote, USA

Senior Manager, Technical Support & Professional Services

- Led and scaled a global SaaS support organization of 20+ direct reports — Technical Support Specialists, Technical Leads, and Project Managers — across Escalation Desk, Platform Support, and ARA functions, driving measurable CSAT and NPS improvements while safeguarding Annual Recurring Revenue (ARR).
- Implemented Dedicated Support & Quarterback model generating $25M in additional annual revenue, while introducing automation initiatives that significantly reduced manual FTE effort and improved customer retention.
- Drove a 32% annual improvement in customer satisfaction (CSAT) through targeted multi-channel support initiatives, translating Voice of Customer (VOC) insights into product roadmap enhancements in collaboration with Product and Technology teams.
- Owned Tier 2 escalation strategy and high-severity incident response — leading cross-functional resolution with Engineering and Product teams, conducting post-incident reviews, and ensuring timely C-level communication during critical events.
- Managed P&L accountability and budget planning for the support organization, overseeing resource allocation, headcount forecasting, and cost optimization to meet financial targets.
- Spearheaded end-to-end people management across remote and global teams — including talent acquisition, staffing pyramid design, workforce planning, performance appraisals, mentoring, and attrition control.
- Championed AI-driven support transformation including intelligent ticket routing, automated escalation triggers, and LLM-assisted knowledge base management — reducing average handle time (AHT) and improving Tier 1 deflection rates.
- Leveraged Agentic AI tools and Claude Code to automate repetitive workflows, enabling the team to redirect focus toward high-complexity customer issues and strategic customer success initiatives.
- Partnered with Engineering and Product teams to evaluate and integrate AI/ML diagnostic tooling for faster Root Cause Analysis (RCA) across multi-product SaaS support environments.
- Built and maintained executive-level reporting through Quarterly Business Reviews (QBR) and Monthly Business Reviews (MBR) leveraging PowerBI, Gainsight, and Salesforce CRM — with direct C-suite relationship management.
- Led international process transitions, partnering with onshore/offshore teams across multiple global locations to deliver cross-border professional services, expand into new markets, and drive customer success outcomes.
- Established SOPs, UAT documentation, knowledge management standards, and Confluence/SharePoint-based training resources ensuring operational consistency, data integrity, and change management excellence.
- Managed complex multi-product technical troubleshooting across hardware, firmware, networking, and cloud environments — building structured RCA methodologies and SME development programs.
- Conducted regular quality audits and data-driven coaching sessions, delivering actionable feedback to ensure adherence to quality standards with focus on account segmentation and churn reduction.

CVENT INC. (A Blackstone Company) | Mar 2013 – Sept 2022 | New Delhi, India

Manager, Client Services (Jan 2022 – Sept 2022)

Assistant Manager, Customer Support (Jan 2019 – Jan 2022)

Senior Product Consultant → Team Lead (Mar 2013 – Jan 2019)

- Managed and led a team of 18 individuals including 9 Support staff, 5 Professional Services Program Managers, and 4 Mobile App Builders, fostering a high-performing, collaborative environment.
- Operationalized Client Services Department (Mobile Solutions) by translating strategy into execution — driving process improvements, automation, and data-driven decision-making across global SaaS operations.

- Migrated offshore technical support operations from Canada to India for an acquired product, achieving annual cost savings exceeding $4 million.
- Defined and drove cross-departmental execution of Client Service (CS) transformation initiatives, closely aligning with the Senior Director of CS Transformation Projects.
- Led IT implementation of InContact integrated with Salesforce CRM, resulting in a 45% acceleration in project delivery and a 67% reduction in error rates.
- Achieved 99.9% product uptime by facilitating cross-product integration and spearheading a major network upgrade in collaboration with the development engineering team.
- Designed and implemented a global Customer Service operations strategy, optimizing existing processes for scalability, efficiency, and improved customer success outcomes.

SERCO INTERNATIONAL | Feb 2010 – Mar 2013 | New Delhi, India
Quality Analyst

- Improved customer satisfaction scores from 85% to 95% through proactive quality monitoring, call audits, and feedback-driven coaching programs.
- Reduced defect rates by 20% through rigorous testing protocols and structured QA processes, improving overall team efficiency by 30%.
- Prepared comprehensive business reports including Quad charts and Pareto analysis, reducing turnaround time for quality assessments by 40%.
- Published monthly performance metrics to UK-based client, ensuring transparency and accountability in performance management.
- Leveraged Excel, Tableau, PowerBI, and SQL for data extraction, analysis, and visualization to drive accurate and timely performance evaluations.
